The Enter button clears the shopping cart when activated in the window with the quantity of goods, only for authorized users

Severity	Issue Type	Frequency	Environment
Medium	Functional	Every time	All Browsers

Action Performed

1. Open <https://www.wildberries.ru/>
2. Sign up (press the login button, enter your phone number, receive, and enter the authorization code)
3. Choose any product from the catalog, add to the shopping cart (i.e., dress)
4. On the shopping cart (<https://www.wildberries.ru/lk/basket>), press the Enter button in the window with the quantity of goods

Expected Result

When the Enter button is activated in the "quantity of goods" window, the user's cart is not cleared, the items of goods are not deleted.

Actual Result

In the shopping cart, when you activate the Enter button in the "quantity of goods" box, the cart is automatically emptied. The message "There is nothing in the cart yet" appears.

Description

In the shopping cart of unauthorized users, the Enter button, when activated in the window with the quantity of goods, works correctly, does not empty the cart and does not delete items
